

Panox

soft gelatin capsules

Composition :

Each soft gelatin capsule contains:

Vitamin A palmitate (eq. to Vitamin A 545 IU)	0.3mg
dl-a- tocophery l acetate (eq. to vitamin E 15 IU)	15mg
Vitamin C	90mg
Zinc oxide (eq. to zinc 10 mg)	12.45mg
Selenium selenite. 5 H ₂ O (eq. to selenium 0.055mg)	0.183 mg
Biotin 1%	0.01 mg

Properties:

Vitamin A palmitate has a number of important functions in the body including its role in immune system function, by protecting the mucous membrane linings antibacterial and antiviral barriers. It is also needed for the growth and maintenance of the skin, and it is essential for the proper function of the eye.

Vitamin E It has a powerful antioxidant in preventing lipid peroxidation of the cell membranes and Essential Fatty Acids and help defense mechanism against damaging effect of free radicals.

Vitamin C is a powerful antioxidant. And act as a cofactor in numerous biological processes such as collagen synthesis, amino acid oxidation, absorption and transport of iron.

Zinc oxide is an essential component of more than 80 different enzyme reactions and involved in many different metabolic processes. It is an essential factor in growth, cell division, cell repair and protein synthesis.

Selenium Participates in the synthesis of endogenous glutathione with optimal protection of cells from oxidative stress and contributes to normal function of the immune system.

Biotin is an essential coenzyme in fat metabolism and in other carboxylation reactions. It plays a role in the Krebs cycle, which is the process in which energy is released from food. Biotin is also helpful in maintaining a steady blood sugar level and is often recommended for strengthening hair and nails

Indication:

Dietary supplement used as antioxidant to improve general health

Dose:

One capsule daily after meal or as prescribe by physician.

Precautions and Warnings

- Don't take the product if taking any other vitamin A supplement.
- Not to be used for children below 12 years old
- Not to be used in case of allergy to any ingredient in the product.
